PROFESSIONAL SUMMARY

Fullstack Developer with hands-on experience designing and developing scalable backend services and responsive frontend applications. Experienced in architecting RESTful APIs, implementing authentication systems, and managing relational and non-relational databases using Clean Architecture principles. Proficient in Golang, Laravel, Next.js, MySQL, PostgreSQL, and Redis, with working knowledge of Node.js, TypeScript, Express.js, and MongoDB. Focused on building secure, maintainable, and performance-optimized production-ready systems.

WORK EXPERIENCE

Laravel Developer Intern

February 2025 - July-2025

PT Winnicode Garuda Teknologi

- Designed and implemented relational database schemas using ERD and MySQL, while optimizing backend query structures to improve data consistency and overall application performance.
- Developed fullstack web applications using Laravel MVC and Bootstrap, integrating authentication and authorization mechanisms (Laravel Breeze & Middleware) to enhance system security and accessibility.
- Built geolocation-based and selfie-verification attendance features through GPS API and face-capture integration, while refining controller logic to improve maintainability and reduce redundant code.

IT Manager Intern

January 2025 - April 2025

PT Ide Kreatif Sejahtera Global

- Oversaw web development progress using Jira and GitHub, ensuring sprint deliverables were completed on schedule and aligned with project timelines.
- Monitored development cycles and identified technical blockers, accelerating feature completion and improving overall team productivity.
- Coordinated cross-functional teams through structured communication (Discord & Zoom) and managed inter-department workflows to maintain consistent and efficient development processes.

PROJECT EXPERIENCE

Personal Blog Website

- Developed a fullstack blog platform to enable structured content management and dynamic article publishing using Laravel 12 and Livewire.
- Designed relational database schemas in MySQL and implemented an admin CMS dashboard using Filament to streamline content and user management.
- Delivered a responsive and maintainable web application with authentication features and optimized UI using Tailwind CSS.

Book Store Backend Service API

- Engineered a scalable RESTful API backend using Golang and Gin-Gonic to manage products, users, and transaction workflows.
- Integrated PostgreSQL via GORM ORM, implemented Redis caching to improve response performance, and applied clean architecture principles for maintainability.
- Integrated Midtrans payment gateway to securely handle online transactions, enabling end-to-end e-commerce backend functionality.

SportON E-Commerce Project (MERN Stack)

- Built a fullstack e-commerce platform using MERN stack to manage product catalogs, user authentication, and transactional processes.
- Developed backend services with Express.js and MongoDB while implementing responsive and interactive frontend interfaces using React.js and Next.js.
- Optimized performance and user experience through structured API integration and server-side rendering capabilities.

EDUCATION FORMAL / NON FORMAL

SMK PLUS PELITA NUSANTARA

July 2020 - June 2023

Software Engineering

- Developed dynamic web applications using HTML, CSS, JavaScript, PHP, Bootstrap, and MySQL, building a strong foundation in fullstack development.
- Applied object-oriented programming (OOP) concepts and modular coding structures to improve code organization and maintainability.
- Learned core software engineering, networking fundamentals, and visual design principles (layout, typography, digital design) to strengthen structured problem-solving skills.

ENIGMA IT BOOTCAMP

January 2025 - May 2025

Golang Backend Development

- Developed scalable RESTful APIs using Golang with Clean Architecture principles to ensure structured and maintainable backend services.
- Implemented JWT authentication and integrated PostgreSQL databases to enhance system security and data reliability.
- Applied Goroutines for concurrency handling and conducted unit/API testing within Agile/Scrum environments to reinforce production-ready backend practices.

YAYASAN PLAN INDONESIA - AGUNA COURSE

December 2025 - Present

Fullstack Development

- Learned fullstack development fundamentals through structured LMS training using HTML, CSS, JavaScript, PHP, and MySQL.
- Built responsive frontend applications by translating Figma designs into React.js, Next.js, and Tailwind CSS implementations.
- Developed backend services using Node.js, Express.js, and MongoDB while integrating RESTful APIs to strengthen end-to-end system integration skills.

ADDITIONAL INFORMATION

- **Programming Languages:** Golang, JavaScript, PHP, TypeScript
- **Frontend Development:** HTML5, CSS3, Bootstrap, Tailwind CSS, Laravel Livewire, Next.js, shadcn/ui
- **Backend Development:** Golang (Gin), Laravel, Node.js, Express.js, RESTful API Design & Development
- **Database & Caching:** MySQL, PostgreSQL, MongoDB, Redis
- **Tools & Workflow:** Git, GitHub, Gitlab, Postman, Insomnia, Jira, Trello, VS Code, DBeaver, TablePlus, pgAdmin, phpMyAdmin, MongoDB Atlas, cPanel
- **Soft Skills:** Problem Solving, Critical Thinking, Time Management, Adaptability, Communication, Team Collaboration.
- **Languages:** Indonesian (Native), English (Elementary)
